WORK EXPERIENCE

Front End Developer

VERIDAY | 2020 - 2021

- Developed web responsive and accessible UI by translating design team's UX wireframes and mockups into responsive, interactive features. Builds codes for Testimonial and news widgets, Slider Carousals, Form and Input Validations and nested navigations.
- Enhanced legacy application by implementing new components using ES6 and CSS3 and ensured cross-browser compatibility and simplicity.
- Used JIRA as bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Involved in daily stand up meetings and coordinated with QA team, used Agile methodologies for software development.

Front End Developer

UNIVERSITY OF TORONTO | 2019 - 2020

- Built interactive data visualization dashboard system using Material-UI and HighChart API to create visually aesthetic graphs and charts, resulting 21% increase in user clicks.
- Developed the Front-End and User Interface of applications using JavaScript, ES6, React and Redux. Used React hooks to handle application life-cycle. Maintaining parent and child elements by using State and Props. Implemented Redux for state management throughout application.
- Participate in code reviews of other team members' work and recommends changes to improve code quality.

Software Developer

IMS INCORPORATED | 2018 - 2019

- Developed dynamic components and customized filters and modules for SaaS based real estate system in order to maintain systems stability and provide clear quality of data.
- Conceptualized and implemented automatic synchronization Single Page Application (SPA). Successfully handled JSON/XML data parsing for form submissions and DOM manipulation.
- Created and implemented a custom CSS smart layouts using flexbox system and CSS frameworks such as Foundation, Bootstrap 4, CSS media queries for mobile responsiveness including SASS.

Full Stack Web Developer

BIZTECHCS | 2015 - 2017

- Developed as well as maintained complex, user-friendly, responsive, web applications such as dynamic employee Leave/Salary management system, Bug tracker system, Project status tools, Punch-In/Out application etc.
- Increased almost 100+ employee's productivity by integrating employee daily evaluation system with task activity and Bug tracker.
